International application No.

| 1. | This opinion co | ontains indications relating to the following items:   |
|----|-----------------|--|
|    | Box No. I       | Basis of the opinion   |
|    | ☐ Box No. II    | Priority   |
|    | ☐ Box No. III   | Non-establishment of opinion with regard to novelty, inventive step and industrial applicability   |
|    | ☐ Box No. IV    | Lack of unity of invention   |
|    | ⊠ Box No. V     | Reasoned statement under Rule 43bis.1(a)(l) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement |
|    | ☐ Box No. VI    | Certain documents cited  |
|    | ☐ Box No. VII   | Certain defects in the international application   |
|    | ☐ Box No. VIII  | Certain observations on the international application  |

#### 2. FURTHER ACTION

If a demand for international preliminary examination is made, this opinion will usually be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA"). However, this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notifed the international Bureau under Rule 66.1 bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion Is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of three months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

For further details, see notes to Form PCT/ISA/220.

## WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

International application No.

PCT/GB2005/000580

### Re Item V.

1) Reference is made to the following documents:D1: US 1 996 539 A (LOUIS DUFAY) 2 April 1935 (1935-04-02)

- 2) The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 34 is not new in the sense of Article 33(2) PCT. The document D1 discloses (the references in parentheses applying to this document): A security device comprising a substrate having a reflective portion (Page 2, col. 2, line 71) which is provided with a raised line structure (Fig. 1 and 2), the line structure defining a plurality of segments (14-17), each segment being formed by a respective set of substantially (vague term) parallel embossed (Page 3, col. 1, lines 14-21) lines (fig. 1 and 2), the lines of at least five (Fig.9) segments (Fig. 6) extending in different directions, wherein each segment causes incident light to be reflected non-diffractively in a variable manner as the angle of incidence changes (Page 3, col. 1, lines 46-61).(cf claim 34).
- 3) Dependent claim 35, when dependent on claim 34, also appears not to be novel.
- 4) Document D1, which is considered to represent the most relevant state of the art, discloses (the references in parentheses applying to this document):

  A security device comprising a substrate having a reflective portion (Page 2, col. 2, line 71) which is provided with a raised line structure (Fig. 1 and 2), the line structure defining a plurality of segments (14-17), each segment being formed by a respective set of substantially (vague term) parallel raised lines (fig. 1 and 2), the lines of at least three segments (Fig. 6) extending in different directions, wherein each segment causes incident light to be reflected non-diffractively in a variable manner as the angle of incidence changes (Page 3, col. 1, lines 46-61).(cf claim 1).

From this, the subject-matter of independent claim 1 differs in that: each line is formed by or carries an ink which does not fully extend into the spaces between the lines or which is sufficiently translucent between the lines so as not to obscure the reflective surface between the lines.

The subject-matter of claim 1 is therefore novel (Article 33(2) PCT)

# WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

International application No.

PCT/GB2005/000580

- 5) The problem to be solved by the present invention may be regarded as the improved security of security documents against forgery.
- 6) The problem is solved by applying an ink which does not fully extend into the spaces between the lines or which is sufficiently translucent between the lines so as not to obscure the reflective surface between the lines.
- 7) The solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT) for the following reasons:

  No available document shows the claimed solution to this problem. Nothing appears to lead a person skilled in the art to the claimed solution.
- 8) The analysis of paragraphs 4 to 7 applies mutatis mutandis to method claim 30, which, therefore, meets the requirements of the PCT with respect to novelty and inventive step.
- 7) Claims 2-29, 31-33 and 35 (when dependent on any of claims 1-29 or 30-33) are dependent on claim 1 and 30 and as such also meet the requirements of the PCT with respect to novelty and inventive step.

### INTERNATIONAL SEARCH REPORT

PCT/GB2005/000580

A. CLASSIFICATION OF SUBJECT MATTER IPC 7 B42D15/00

According to International Patent Classification (IPC) or to both national classification and IPC

#### B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols) IPC 7 B42D

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, PAJ

| Category ° | Citation of document, with indication, where appropriate, of the relevant passages  | Relevant to claim No. |
